ATHENS, GA., Nov. 22, 1859.

Dear Sir: Rhodes' Super-Phosphate has been applied by me this year, on a small scale, to both Corn and Cotton. The result exceedep my expectation, although the experiments, for many reasons, were not, and could not be conducted with due caution; yet I am entirely satisfied, that the growth of weed, in both instances, the fruit in corn, and the number of bolls of cotton, were fully double the yield in the portions unmanured, and this when only a table-spoonful of the Super-Phosphute was applied as a top-dressing to each hill of corn, and a tea-spoonful to each stalk of cotton—and the last as late in the season as the 18th of July. Some of the weed grew to nine feet high, with six feet branches, covered with bolls, while the unmanured was not half so good. It is my intention next year, to test it more fully.

Yery Respectfully,

Your most ob't serv't,

(Signed)

UNION POINT, (G. R. R.) Nov. 28, 1859. Messrs, J. A. Ansley & Co. : Gents.—I bought a ton of Rhodes' Super Phosphate in Baltimore, last Spring, Mr. H. D. Leitner, of Berzelia, to test its value as a manure. I put about 125 lbs. on an acre of cotton, in the drill, on land that would not make over 75 to 100 lbs. of seed cotton per acre, without Manure. The result is entirely satisfactory. I have made at least from 450 to 500 lbs. to the sace on this very poor land. I expect to purchase from 5 to 8 tons for my Spring crop. My Overseer wishes me to put his name to this also. Yours, in great haste.

Screfula or King Evils,

Scrofula or King' Evils,
Is a constitutional disease a corruption of the blood, by which this fluid becomes vitiated, weak, and poor. Being in the circulation, it pervades the whole body, and may burst out in disease on any part of it. No organ is free from its attacks, nor is there one which it may not destroy. The scrofulous taint is variously caused by mercuriht disease, low living, disordered or unhealthy food, impure air, fifth and filthy habits, the depressing vices, and, above all, by the venerial infection. Whatever be its origin, it is hereditary in the constitution descending "from parents to children unto the third and fourth generation:" indeed, it seems to be the rod of Him who says, "I will visit the iniquities of the fathers upon their children."

dren."

Its effects commence by disposition from the blood of corrupt or ulcerous matter, which, in the lungs, liver, and internal organs, is termed tubercles; in the glands, swellings; and on the surface, eruptins or sores. This foul corruption, which genders in the blood, depresses the energies of life, so that scrofulous constitutions not only suffer from scrofulous complaints, but they have far less power to withstand the attacks of other diseases; consequently, vast numbers perish by disorders which although not scrofulous in their nature, are still rendered fatal by this taint in the system. Most of the concumption which decimates the human family has its origin directly in this contamination; and many destructive diseases of the liver, kid-

ly has its origin directly in this contamination; and many destructive diseases of the liver, kidneys, brain, and indeed, of all the organs arise from or are aggravated by the same cause.

One quarter of all our people are scrofulous; their persons are invaded by this lurking infection, and their health is undermined by it. To cleanse it from the system we must renovate the blood by an alterative medicine, and invigorate it by healthy food and exercise. Such a medicine we supply in

Ayer's Compact Extract of Sarsaparilla, the most effectual remedy which the medical skill of our times can devise for this everywhere prevailing and fatal malady. It is combined from the most active remedials that have been discovered for the expurgation of this ford disorder from the blood, and the rescue of the extent from its detection. the system from its destructive consequences. Hence it should be employed for the cure of not only scrofula, but also those other affections only scrofula, but also those other affections which arise from it, such as Eruptive and skin Diseases, St. Antony's Fire, Rose, or Erysipelas Pimples, l'ustules, Elotches, Blains and Boils, Tumors, Tetter and Salt Rheum, Sould Head, Ringworm, Rheumatism, Syphilitic and Mercurial Diseases, Dropsy, Dyspepsia, Debility, and, indeed, all Complaints arising from Vitiated or Injure Blood. The popular belief in impurity of the blood is founded in truth, for scrotum is a degeneration of the blood.
